FOREWORD

Statistics on Social Work Education in the United States is published annually by the Council on Social Work Education. Data are provided by CSWE accredited baccalaureate and masters degree programs of social work education. Data on the number of students receiving degrees cover the academic year 1991-92. All other data are reported as of November 1, 1992.

Special appreciation is extended to Todd Lennon who compiled and analyzed the data and wrote this report. I also would like to express my appreciation to the program deans, directors, faculty and staff for their cooperation in completing the survey instruments.

June 1, 1993

Donald W. Beless
Executive Director

INTRODUCTION

This report contains the results of a survey of all baccalaureate and masters degree programs in social work accredited by the Council on Social Work Education in September 1992. At the time the data were collected, there were 523 social work degree programs either fully accredited or in candidacy status for accreditation. Of those programs, 158 were jointly administered masters/baccalaureate programs, 38 were masters degree programs, and 324 were baccalaureate degree programs. There were 11 masters programs and 30 baccalaureate programs in candidacy. Fifty-three doctoral programs affiliated with masters programs were also surveyed. Lists of accredited baccalaureate and graduate social work degree programs may be found in Appendices B and C.

On September 17, 1992, one survey for faculty and program data and one to three surveys for student data were sent to all accredited programs, depending upon the administration and accreditation status of the program. The surveys used were as follows:

- Schedule I - Social Work Education Programs and Faculty
- Schedule II - Statistics on Baccalaureate Social Work Education Programs
- Schedule III - Statistics on Master of Social Work Education Programs
- Schedule IV - Statistics on Doctoral Social Work Education Programs
- Schedule V - Statistics on Social Work Education Programs in Candidacy

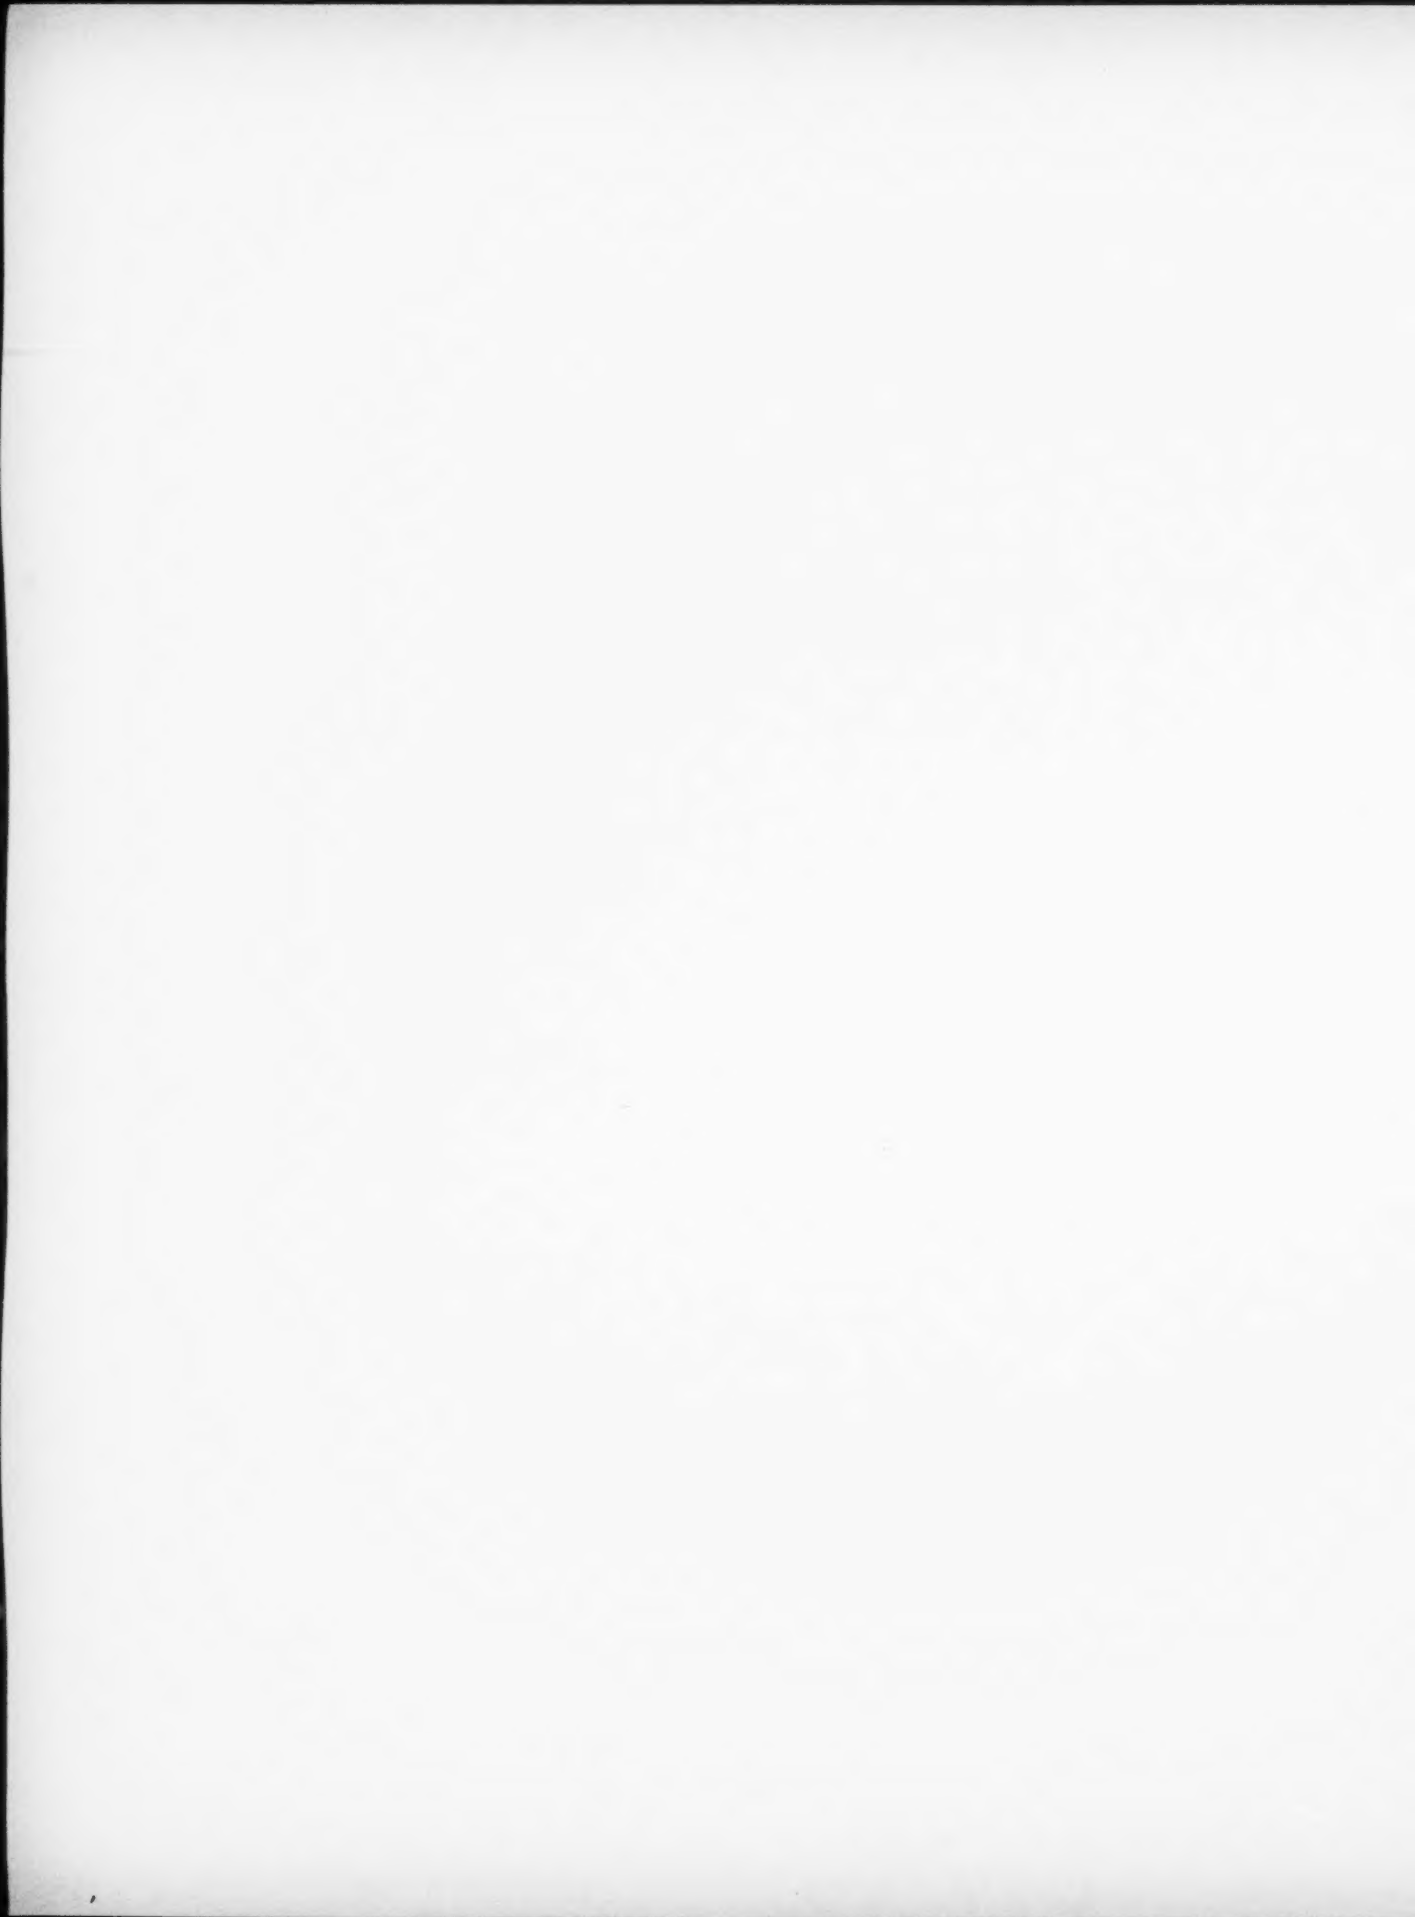

Although deadline dates of November 2, 1992 (for Schedule I) and November 16, 1992 were requested, the number of responses received by those dates was not sufficient to begin aggregation at that time. Consequently, schedules were accepted until early April 1993.

Response rates to the schedules varied (see Table 1). Schedule I was sent to all social work programs, regardless of their accreditation status. Jointly administered baccalaureate/masters programs were sent one copy of Schedule I. Of the 441 programs sent Schedule I, 416 (94.3%) returned it. High response rates were recorded for each of the accredited programs' schedules and a majority of candidate programs responded to Schedule V. Response rates for all schedules (except for those of doctoral programs) rose again this year. However, despite the extended period of accepting responses and repeated appeals for returns this year, there has not been a 100% response from programs since 1982.

TABLE 1
Number of Responses to 1992 Survey Schedules I - V

Schedule Sent	Number Sent	Number Received	Percent Received
Schedule I	441	416	94.3
Schedule II	374	351	93.9
Schedule III	106	104	98.1
Schedule IV	53	49	92.5
Schedule V	41	38	92.7

Many factors have influenced the presentation of this report. Due to rounding decimals to one or two places, percent totals or sub-totals within tables may not reflect the exact sum of the numbers preceding them. Also, totals in all tables may not correspond with one another due to the variation in response rates. In many cases, programs chose not to respond to a particular item in the survey, or incorrect data were received and requests for corrections went unanswered. Two pairs of undergraduate programs chose to report data together. The College of St. Benedict and St. John's University reported together as did the Rutgers University New Brunswick and Camden campuses.

SOCIAL WORK EDUCATION PROGRAMS

Geographic Distribution

The geographic distribution of social work education programs and faculty remains virtually unchanged from last year (see Table 2). The midwestern states (Region 5) have the highest concentration of social work education programs and faculty, reporting the higher numbers at the baccalaureate and joint masters/baccalaureate levels. The majority of programs still are located in the eastern half of the nation (Regions 1-5, 68.3% of programs).

TABLE 2

Social Work Education Programs and Faculty, by Geographic Region and Level of Program*

Region	Level of Program							
	Graduate Only		Joint		Baccalaureate		Total	
	Programs	Faculty	Programs	Faculty	Programs	Faculty	Programs	Faculty

* Column totals may not correspond between tables within this report due to variance in response rates.

Region 1 - Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont

Region 2 - New Jersey, New York, Puerto Rico, Virgin Islands

Region 3 - Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia

Region 4 - Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee

Region 5 - Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin

Region 6 - Arkansas, Louisiana, New Mexico, Oklahoma, Texas

Region 7 - Iowa, Kansas, Missouri, Nebraska

Region 8 - Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming

Region 9 - Arizona, California, Hawaii, Nevada

Region 10 - Alaska, Idaho, Oregon, Washington

Institutional Characteristics

Table 3 shows that the majority of social work education programs are located in state institutions. State institutions also employ 61.3% of all social work faculty. Church-related institutions house most of the programs located in private colleges or universities. Of all social work programs in private institutions, 118 (64.1%) are church-related baccalaureate programs. Most of these programs are very small in size; their 426 faculty are very spread out as compared with the 1,558 faculty members of the remaining 66 private institutions. The institutional auspices of colleges and universities with social work degree programs have not changed significantly from year to year.

TABLE 3

Social Work Education Programs and Faculty, by Institutional Auspices and Level of Program*

Institutional Auspices	Level of Program							
	Graduate Only		Joint		Baccalaureate		Total	
	Programs	Faculty	Programs	Faculty	Programs	Faculty	Programs	Faculty
Public								
State	17	526	61	1,889	149	893	227	3,308
Other	1	89	0	0	4	19	5	108
Private								
Church-related	5	192	7	219	118	426	130	837
Other	14	614	9	373	31	160	54	1,147
Total	37	1,421	77	2,481	302	1,498	416	5,400

* Column totals may not correspond between tables within this report due to variance in response rates.

As noted in Table 4, graduate and joint programs are most likely to be found in institutions with more than 10,000 full-time students. Conversely, stand-alone baccalaureate programs are most likely to be found in institutions with full-time enrollments of less than 10,000. At the baccalaureate level, of those institutions with less than 2,000 students, 79.0% are located in private, church-related institutions. The other stand-alone baccalaureate programs are spread out among institutions with larger enrollments. The distribution of programs across institutions of various sizes has not changed since last year.

TABLE 4

Social Work Education Programs, by Size of College/University Enrollment and Level of Program*

Full-time Enrollment	Level of Program			
	Graduate Only	Joint	Baccalaureate	Total
Under 2,000	5	0	95	100
2,000 - 4,999	4	9	72	85
5,000 - 9,999	6	8	59	73
10,000 - 19,999	7	19	56	82
20,000 and over	15	41	20	76
Total	37	77	302	416

* Column totals may not correspond between tables within this report due to variance in response rates.

The predominant ethnic/gender identification of the colleges and universities with social work degree programs continues to be "non-ethnic, coeducational" (88.0%). Social work education programs in "black, coeducational" institutions make up 6.5% of all programs and non-ethnic, women's institutions house 3.8% of all programs. One institution was identified as "black, women's," and 6 were "other ethnic, coeducational."

Number of Faculty

Baccalaureate programs typically have faculties numbering less than 10 (281 of 302 in Table 5). There are no baccalaureate programs with more than 30 faculty. Larger faculties are characteristic of joint masters/baccalaureate and stand-alone graduate programs. The mean number of faculty members in graduate and joint programs is 34.23 and the mean number of faculty members in baccalaureate programs is 4.96. These means differ slightly from last year with an increase of 0.26 for graduate and joint and a minute decrease of 0.01 for baccalaureate.

TABLE 5

Social Work Education Programs, by Number of Faculty and Level of Program*

Number of Faculty	Level of Program			
	Graduate Only	Joint	Baccalaureate	Total
Less than 10	4	3	281	288
10 - 19	3	16	21	40
20 - 29	8	25	0	33
30 - 39	6	13	0	19
40 - 49	5	8	0	13
50 - 59	6	4	0	10
60 and over	5	8	0	13
Total	37	77	302	416

* Column totals may not correspond between tables within this report due to variance in response rates.

SOCIAL WORK FACULTY

Each program reported faculty data on Schedule I. Although programs reported on 5,400 faculty members, the data received on many faculty members were incomplete or inaccurate. These faulty cases were not included in the following tables, so none of the tables will show information on all of the faculty members reported by programs. Likewise, care should be taken when comparing the data in the various tables because of the various response rates.

One part of the survey asked programs to report the percentage of a full-time equivalent (FTE) each faculty member spent in social work and other institutional responsibilities. For this report, "full-time" refers to those faculty members who spend 50% or more of their time in the social work program. This distinction should be kept in mind while reviewing Tables 6 and 8 and Tables 18 through 24.

Time in Social Work Education

Of all social work faculty, 59.9% spend 100% of their time in the social work program. An additional 9.2% of full-time social work faculty spend 50 - 99% of their time in social work. Table 6 shows that a greater percentage of faculty in baccalaureate programs hold full-time appointments in social work than do their colleagues in graduate programs. This indicates that graduate programs are more likely to use part-time faculty than are baccalaureate programs. A very small percentage (3.3%) of faculty holding full-time college/university appointments spend less than 50% of their time in social work. The distribution of faculty throughout Table 6 has remained relatively constant through recent years.

TABLE 6

Faculty, by Type of College/University Appointment, Level of Program,
and Percent of Time in Social Work Education*

Percent of Time to Social Work	Type of College/University Appointment	Level of Program							
		Graduate Only		Joint		Baccalaureate		Total	
		#	%	#	%	#	%	#	%
100%	Full-time	779	57.1	1,389	59.9	923	62.3	3,091	59.9
50 - 99%	Full-time	117	8.6	179	7.7	181	12.2	477	9.2
25 - 49%	Full-time	20	1.5	22	0.9	50	3.4	92	1.8
	Part-time	204	14.9	311	13.4	203	13.7	718	13.9
Less than 25%	Full-time	33	2.4	18	0.8	27	1.8	78	1.5
	Part-time	212	15.5	398	17.2	98	6.6	708	13.7
Total		1,365	100.0	2,317	100.0	1,482	100.0	5,164	100.0

* Column totals may not correspond between tables within this report due to variance in response rates.

Table 7 displays the distribution of time faculty members are assigned to the baccalaureate and graduate levels in jointly administered social work programs. This table indicates that joint programs devote more faculty to the graduate program than to the baccalaureate program. Over half of the faculty members in such programs spend all of their time in the graduate program. This percentage shows an increase of 0.8 from last year. The percentage of faculty devoted entirely to the baccalaureate program also increased. The other categories saw a decrease.

TABLE 7

Faculty in Jointly Administered Programs,
by Time Assigned to Graduate and Baccalaureate Social Work Education 1991-1992*

Time Assigned to Graduate and Baccalaureate Social Work Education	1991		1992		% Change
	#	%	#	%	
All to Graduate	1,093	53.1	1,194	53.9	0.8
Most to Graduate	367	17.8	351	15.8	-2.0
Equal to Both	218	10.6	218	9.8	-0.8
Most to Baccalaureate	142	6.9	141	6.4	-0.5
All to Baccalaureate	239	11.6	312	14.1	2.5
Total	2,059	100.0	2,216	100.0	

* Column totals may not correspond between tables within this report due to variance in response rates.

Fifty-three of the graduate programs also offer a doctoral program. Table 8 shows how much time faculty members in those programs spend in the doctoral program. Only 7.7% of graduate faculty spend more than half of their time in the doctoral program, while 63.3% spend none. Faculty members who teach part-time in the doctoral program make up 29.0% the faculty in programs where a doctorate is offered.

TABLE 8

Full-time Faculty in Programs Offering Doctoral Social Work Education,
by Percentage of Time Assigned to Doctoral Level*

Percent of Time Assigned to Doctoral Level	#	%
None	886	63.3
1 - 24%	260	18.6
25 - 49%	146	10.4
50% and over	108	7.7
Total	1,400	100.0

* Column totals may not correspond between tables within this report due to variance in response rates.

Demographic Characteristics

The following tables display various demographic characteristics of social work faculty, including age, gender, ethnicity, highest earned degree, rank, primary responsibility within the social work program, tenure, and salary. To maintain continuity with previous years' statistics, data for faculty assigned to jointly administered masters/baccalaureate programs have been aggregated with those of stand-alone masters program faculty.

Gender and Ethnicity

The distribution of male and female faculty members by age groups is displayed in Table 9. The modal age groups for males at each level and females at the baccalaureate level remain the same as last year, while the modal age group for females at the graduate/joint level changed from 45-54 to 35-44. Males are more likely to be older than females at each level. The mean ages for males are 50.4 (graduate/joint) and 48.1 (baccalaureate). The mean graduate/joint female faculty member's age is 47.4, while the mean baccalaureate female faculty member's age is 45.1. On average, baccalaureate faculty members are 2.3 years younger than their counterparts at the graduate/joint level.

TABLE 9

Faculty, by Age, Gender, and Level of Program*

Level of Program	Age	Gender					
		Male		Female		Total	
		#	%	#	%	#	%
Graduate and Joint	Under 35	84	5.2	179	8.2	263	6.9
	35 - 44	402	25.0	728	33.3	1,130	29.8
	45 - 54	597	37.1	856	39.2	1,453	38.3
	55 and Older	526	32.7	422	19.3	948	25.0
	Total	1,609	100.0	2,185	100.0	3,794	100.0
Baccalaureate	Under 35	56	9.1	116	13.1	172	11.5
	35 - 44	158	25.8	348	39.3	506	33.8
	45 - 54	272	44.4	319	36.0	591	39.5
	55 and Older	127	20.7	102	11.5	229	15.3
	Total	613	100.0	885	100.0	1,498	100.0

* Column totals may not correspond between tables within this report due to variance in response rates.

Table 10 displays the ethnicity of male and female social work education faculty members. The ethnic categories used in the survey were based on previous years' surveys and the membership categories of the Council. "Foreign" faculty are those faculty who are in the United States without a resident visa. There was a slight increase from last year in the percentage of ethnic minority faculty at both levels (0.8 points). This continues the increase noted last year at the baccalaureate level. African Americans continue to be the largest minority group, comprising 61.8% of all minorities at the graduate/joint level and 68.9% at the baccalaureate level. The percentage of male graduate/joint faculty members who are ethnic minorities is virtually the same as that of the women. However, 9.2 percentage points separate male and female minority faculty members at the baccalaureate level. Nearly one third of female baccalaureate faculty members are minorities.

TABLE 10

Faculty, by Ethnicity, Gender, and Level of Program*

Level of Program	Ethnicity	Gender					
		Male		Female		Total	
		#	%	#	%	#	%

	Total	613	100.0	883	100.0	1,496	100.0

* Column totals may not correspond between tables within this report due to variance in response rates.

Educational Attainment

The educational attainment of male and female social work education faculty members is displayed in Table 11. Graduate/joint faculty are more likely to hold doctorates than are their baccalaureate-level counterparts. The percentage of graduate/joint faculty with a masters degree in social work as their highest degree increased by 3.6. Almost three times as many baccalaureate faculty members hold a masters in social work as their highest degree, than do those with a doctorate in social work. The masters degree in social work is the highest earned degree for over half of baccalaureate faculty. At both levels, men are more likely than women to hold a doctorate. Of all faculty who hold doctorates, those holding doctorates in social work are in the majority. Small proportions of social work faculty hold degrees in medicine or law or other degree categories than masters or doctorates. Likewise, very few social work faculty hold masters degrees in fields other than social work as their highest earned degree.

TABLE 11

Faculty, by Highest Earned Degree, Gender, and Level of Program*

Table 12 displays the educational attainment of social work education faculty members by ethnic categories. The most reliable percentages displayed here are under the African American and White categories--the other minority categories have relatively few cases counted and should be interpreted with caution. Keeping in mind the small numbers in most of the minority categories, there were no significant changes from last year in the proportions noted within this table. Asian Americans continue to have the highest percentage of doctorates in social work at both levels. At least half of all baccalaureate faculty in each ethnic category (except Asian Americans and Other) have masters degrees in social work as their highest earned degree.

Almost all social work faculty hold masters degrees in social work (91.8%). Table 13 shows that those faculty members who do not have masters degrees in social work usually hold doctorates in fields other than social work. A comparison with the 1991 report shows that the number of faculty at both levels that do not hold a masters degree in social work increased three-fold. This may be due to the fact that the instructions for Schedule I directed respondents to enter a code for faculty members that hold a masters degree in social work, but did not offer a code for those who do not. Consequently, upon data entry, blank entries for this section of the survey were counted as negative cases, not missing.

Rank

Table 14 displays the distribution of rank among social work education faculty. At the graduate/joint level, faculty members are fairly evenly distributed between the three highest ranks, less so between the other ranks. However, assistant professors make up the highest percentage of females and full professors are most frequently male. Assistant professors also are the most frequent among female baccalaureate faculty members. Males at the baccalaureate level are most frequently associate professors. Although graduate/joint faculty at the ranks of full professor, associate professor, and assistant professor are evenly distributed, baccalaureate faculty become less frequent as the level of rank increases. Women are more likely to hold the rank of instructor or lecturer at both the graduate/joint and baccalaureate levels than are men.

* Column totals may not correspond between tables within this report due to variance in response rates.

The educational attainment of faculty and their rank is displayed in Table 15. Full professors typically have doctorates. At the graduate/joint level, all three higher ranks have mostly doctorates, while the lower three categories are mostly masters degrees in social work. At the baccalaureate level, doctorates are most frequent at the full professor and associate levels. The majority of assistant professors and lower hold masters degrees in social work.

Table 16 displays the distribution of rank by ethnicity. Again, due to the small number of minority faculty members, caution should be taken in interpreting these percentages. Asian Americans have the highest percentage of full professors among minority faculty at the graduate/joint level and Chicano/Mexican Americans have that distinction at the baccalaureate level. As noted in Table 12, Asian Americans also have the highest percentage of doctorates.

TABLE 16

Primary Responsibility

Tables 17 and 18 show the distribution of the primary responsibility of social work faculty within the social work program. Those faculty members with formal administrative titles are included under those specific titles. For those faculty without formal administrative titles, programs were asked to report the time individuals spent in classroom teaching, field instruction, field liaison responsibilities, administration, and other social work responsibilities. No definitions were given for these categories. For this report, "primary responsibility" is defined as that responsibility that receives the greatest amount of the faculty member's time. Those faculty members who spend equal amounts of time in classroom and field instruction or liaison activities were combined as were those who spend most of their time in field activities. Individuals who spend most of their time in "other" social work responsibilities or did not specify a formal administrative title but spend most of their time in administration are listed as "other."

Table 17 displays the primary responsibilities of social work faculty. This year there was a slight decrease in the percent of graduate/joint faculty spending the majority of their time with teaching responsibilities. At the baccalaureate level, 68.1% of the faculty spend most of their time teaching. This reflects a slight decrease as well. At both levels, most of these faculty primarily are classroom teachers. There is no significant difference between males and females in this characteristic; however, the percentage of females at the graduate/joint level in field work is clearly higher than that of the males in the same position. More males than females are primarily responsible as dean/director of graduate/joint programs, but at the baccalaureate level directors are split evenly between males and females. There are more females who are classroom teachers at each level. Although males outnumber females as dean/directors, more females are assigned administrative titles.

TABLE 17

* Column totals may not correspond between tables within this report due to variance in response rates.

Table 18 further breaks down the responsibilities of social work faculty. It displays the mean percentage of time spent in classroom teaching, field instruction, field liaison, administration, and other social work responsibilities. The proportion of time spent in the different responsibilities is comparable across the two levels. As would be expected, classroom teachers spend far more of their time with classroom responsibilities. However, the means indicate that, with the exception of graduate/joint field instructors, no matter what their primary responsibility, all social work faculty spend at least 10% of their time in classroom teaching. Baccalaureate administrators spend far more time in the classroom than do their graduate/joint counterparts. Considering that baccalaureate programs average under five faculty members, it is not surprising that baccalaureate faculty members carry multiple responsibilities.

TABLE 18

Mean Percentage of Time Full-time Faculty Members Assigned to Responsibilities in Social Work Programs by Primary Responsibility, and Level of Program

Level of Program	Primary Responsibility	Mean Percentage Assigned

Years on Full-time Faculty

Table 19 displays the number of years social work faculty were reported to have been on full-time status in the social work program. The survey did not specify the definition of "full-time." Associate professors at the baccalaureate level have spent the most time on the social work faculty. It is interesting to note that of the newly hired faculty at the graduate/joint level, over half were hired at the lower ranks. This may indicate a tendency of programs to hire more temporary or adjunct faculty. It is also important to note that a disproportionate number of males were hired at the full professor rank. The same holds true for females at the lower ranks.

TABLE 19

Years on Full-time Faculty, by Gender, Rank, and Level of Program*

Level of Program	Rank	Gender	Years on Full-time Faculty				
			0	1 - 5	6 - 10	11 & Over	Total

* Column totals may not correspond between tables within this report due to variance in response rates.

Tenure

The proportion of full-time social work faculty members with tenure is displayed in Tables 20 and 21. Table 20 shows that, at the graduate/joint level, tenured faculty with a doctorate outnumber those who do not. Over half of graduate/joint faculty members hold a doctorate in social work. At the baccalaureate level, just under half of those faculty holding tenure also hold a masters degree in social work as their highest earned degree. These proportions have not changed significantly since 1991. Social work faculty holding tenure typically hold an advanced degree in social work. Table 21 shows the highest earned degree, rank, and gender of social work faculty holding tenure. The percentage of females holding tenure in graduate/joint programs has increased slightly. The same figure at the baccalaureate level also has increased. Note the even distribution of males and females holding tenure at the baccalaureate level.

TABLE 20

Salary

Data were gathered on the salaries of full-time social work faculty. Table 22 displays the median salaries and middle 50% range of salaries of non-administrative faculty by rank and region. Medians are reported here because of the wide range of salaries reported. All salaries reported in Table 22 are adjusted to reflect a nine-month academic year. Raw salary data reported for periods other than nine months were increased or decreased proportionately. Medians are shown for regions that reported at least five cases at a particular level. This section of the survey was most often reported inaccurately or not reported at all; therefore, care should be taken when examining data, especially when comparing salary data from year to year.

One of the factors influencing this table is the definition of "full-time" as those faculty members who spend at least 50% of a full-time equivalent on social work responsibilities. Therefore, a \$15,000 salary likely belongs to a faculty member who only spends half the time of his/her colleague who has a full teaching load. As mentioned above, this section of the survey was most often reported inaccurately. Because variables such as time spent in the social work program, months on which the salary is based, and the salary itself are all used to determine the cases and salary used in Tables 22-24, respondents may have reported incorrect data for one or more of the variables. Of the adjusted salaries listed in these tables, 179 are under \$15,000, 123 at the graduate/joint level and 56 at the baccalaureate level. One full-time baccalaureate faculty member is excluded from these tables because the respondent indicated that that individual donates time to the program.

As would be expected, full professors receive higher salaries than associate professors do; likewise, associate professors receive higher salaries than assistant professors do. Full professors with appointments in graduate/joint programs make 23.1% more than their baccalaureate-level counterparts do. The difference is noticeably smaller at the lower two ranks, with 16.1% and 16.3% between them. The median salaries have increased slightly from last year--2.5%, 0.5%, and 2.2% for graduate/joint full professors, associate and assistant professors, respectively. Their baccalaureate counterparts also experienced slight increases of only 5.9%, 0.1%, and 1.9% for corresponding ranks.

The eastern half of the country (Regions 1-5) continues to pay the highest salaries, albeit not by much. Broken down by region, Regions 9 and 10 pay the highest salaries overall. Region 6 is at the low end of the pay scale.

Table 23 shows the median salaries reported for full-time faculty members according to their primary responsibility within the social work program. One column of salaries displays the actual salaries received by faculty members regardless of the number of months it took them to earn that salary. The other column displays the same salaries adjusted to a nine-month academic year as was done in Table 22. The deans/directors and associate deans/directors at the graduate/joint level report the highest median salary. At the baccalaureate level, program directors reported the highest median salary. Of the non-administrative faculty, classroom teachers were highest paid at both levels. At both levels, classroom teachers outnumber the other non-administrative faculty by very wide margins.

TABLE 22

Median Salary and Middle 50 Percent Salary Range of Full-time Non-administrative Faculty,
by Geographic Region, Level of Program, and Rank¹

Rank	Region ²	Graduate and Joint Programs			Baccalaureate Programs

Table 24 compares the median salaries of full-time non-administrative faculty members, broken down into categories representing ethnicity, gender, highest earned degree, and rank. In general, female faculty members receive a lower salary than do their male counterparts. Half of the cells displaying median salaries for minority faculty members show medians lower than their white counterparts. Faculty holding masters degrees as their highest earned degree usually have a lower salary than do their colleagues holding the same rank and ethnicity. Comparisons within this table are difficult, given the number of cases reported in each cell.

TABLE 24

Median Salary of Full-time Non-administrative Faculty,
by Ethnicity, Gender, Rank, Highest Earned Degree, and Level of Program*

Level of Program	Rank	Ethnicity	Highest Earned Degree							
			Doctorate				Masters			
			Male		Female		Male		Female	
			Salary---	#	Salary---	#	Salary---	#	Salary---	#

** Less than five cases reported.

*** Salary data are adjusted for a nine-month academic year.

Table 25 shows that the main source of faculty salaries remains the university itself. Classroom teachers generally receive the highest percentage of their salary from inside university sources. As noted before, the classroom teachers make up the vast majority of non-administrative faculty, so the means displayed in Table 25 for classroom teachers are a more accurate reflection of this characteristic than the others.

TABLE 25

Mean Percentage of Non-administrative Faculty Salary from Internal University Sources,
by Primary Level of Responsibility, Type of Appointment, and Level of Program

Level of Program	Primary Responsibility	Type of Appointment		Total
		Full-time	Part-time	
Graduate and Joint	Classroom Teaching	98.8	97.8	95.5
	Classroom and Field	96.6	100.0	
	Field Instruction/Liaison	85.7	97.9	
	Other	81.2	78.6	
Baccalaureate	Classroom Teaching	98.8	98.2	98.5
	Classroom and Field	97.0	100.0	
	Field Instruction/Liaison	99.4	100.0	
	Other	97.5	100.0	

Number of Publications

Programs were asked to report on the number of publications that actually appeared in print during the preceding academic or calendar year, whichever year conforms to their record-keeping system. The five categories of publications were defined as refereed articles, books published by formal publishing companies, published book chapters and conference proceedings, monographs, and book reviews. To adjust for multiple authorship, respondents were asked to enter the fraction of authorship undertaken by the faculty member. For example, a faculty member who wrote an article with another colleague would be reported as having written .5 of an article. Blank spaces in this section of the form were interpreted as being equal to zero, although many of these cases simply may be missing data. The ability of the programs to report every faculty member's publication is questionable; therefore, the reliability of this section of the report is not good.

Taken as a whole, on average, faculty members published .30 articles, .04 books, .12 book chapters, .15 monographs, and .08 book reviews. Incomplete data were received on many faculty, so these numbers may be somewhat misleading. Among the group of faculty members who published a total of at least one item ($n=1,256$), an average of 1.20 articles, .18 books, .47 book chapters, .58 monographs, and .33 book reviews were published. It is clear that refereed articles are the publishing medium of choice among social work faculty. Females appear to publish less frequently than do their male counterparts. All of these figures are nearly identical to the ones reported last year.

BACCALAUREATE STUDENTS

Baccalaureate social work education programs reported on various aspects of their student body on Schedule II. As noted in Table 1, 351 of 374 programs (93.9%) returned data on Schedule II. The tables in this section report data only on juniors and seniors because some programs do not allow students to choose majors until their junior year. Also, due to the November 16, 1992 deadline for statistics, many programs did not have access to data showing the major declaration of incoming freshmen. Program data are listed individually in Appendix A in Tables 100 and 101. Again, the Schedules requested different data on the same population. Responses varied within the schedules, so comparison between tables may be unreliable. For instance, one table reporting the number of juniors and seniors enrolled (one section of Schedule II) may not agree with another table reporting that same population's ethnicity (another section of the form).

Table 26 reports junior and senior enrollment in baccalaureate programs. Baccalaureate programs typically have small student bodies. Just over two-thirds of the programs have fewer than 75 juniors and seniors enrolled. Almost half of the programs have fewer than 50 juniors and seniors. Distribution across the categories is the similar to last year's statistics. The median junior and senior enrollment size this year was 52, up from 49 last year.

TABLE 26

Accredited Baccalaureate Programs, by Size of Full-time Junior and Senior Year Enrollment*

Junior and Senior Enrollment	#	%
Under 25	71	20.3
25 - 49	100	28.7
50 - 74	68	19.5
75 - 99	45	12.9
100 - 149	42	12.0
150 and over	23	6.6
Total	349	100.0

* Column totals may not correspond between tables within this report due to variance in response rates.

The total reported enrollment of full-time baccalaureate social work degree students is 35,007. This reflects an increase of 7.0% over last year. This figure should be interpreted cautiously, however, because 31 accredited programs were not included in last year's report. Freshmen and sophomores accounted for 12,576 of full-time students. Baccalaureate programs reported that 5,812 students are enrolled part-time in their program and 21,257 students are enrolled in one or more social work courses, but not working toward a social work degree. A review of past years' statistics shows that until 1984 there was a steady decline in baccalaureate student enrollment. Enrollment in each of the categories noted above has increased every year since 1984, except in 1989.

The gender breakdown of juniors and seniors and 1991-92 graduates is displayed in Table 27. Females continue represent the majority of baccalaureate students (84.9%) and graduates (86.9%). Corresponding with the increased enrollments reported, the number of baccalaureate degrees awarded in 1991-92 increased from 8,778 to 9,510, an 8.0% increase.

TABLE 27

Juniors and Seniors Enrolled Full-time in Baccalaureate Programs on 11/1/92,
and Students Awarded Baccalaureate Degrees in 1991-92, by Gender*

Gender	Juniors and Seniors Enrolled		Students Awarded Degrees	
	#	%	#	%
Female	18,976	84.9	8,260	86.9
Male	3,383	15.1	1,250	13.1
Total	22,359	100.0	9,510	100.0

* Column totals may not correspond between tables within this report due to variance in response rates.

The ethnic distribution of juniors and seniors and 1991-92 baccalaureate degree recipients is shown in Table 28. The number of ethnic minorities enrolled in baccalaureate social work education and receiving baccalaureate degrees increased this year. Increases have not occurred with enough frequency or pattern to establish a trend. Any changes from year to year may be due to the variation of response rates. "African American" continues to be the most frequent ethnic minority identification among those juniors and seniors enrolled in baccalaureate programs, outnumbering the other ethnic minorities by almost two-thirds. Chicano/Mexican Americans and Puerto Ricans are the next most frequent. Although the survey did not allow the specification of minorities in the "Other" category, some respondents chose to write in various Hispanic ethnic groups.

TABLE 28

Juniors and Seniors Enrolled Full-time in Baccalaureate Programs on 11/1/92,
and Students Awarded Baccalaureate Degrees in 1991-92, by Ethnicity*

Ethnicity	Juniors and Seniors Enrolled		Students Awarded Degrees	
	#	%	#	%
African American	3,695	16.5	1,320	13.9
Asian American	398	1.8	115	1.2
Chicano/Mexican American	915	4.1	279	2.9
Native American	273	1.2	109	1.1
Puerto Rican	620	2.8	278	2.9
Other Minority	205	0.9	97	1.0
Total Minorities	6,106	27.3	2,198	23.1
Foreign	115	0.5	46	0.5
White	16,138	72.2	7,266	76.4
Total	22,359	100.0	9,510	100.0

* Column totals may not correspond between tables within this report due to variance in response rates.

GRADUATE STUDENTS

Data on masters and doctoral students were gathered with Schedules III and IV, respectively. Similar data were collected on each form, but only selected sections of Schedule IV were used for this report. Although the Council does not accredit doctoral education, the past practice of collecting data from doctoral programs at the same time masters program data were collected was continued this year. As is true throughout this report, some tables may not correspond with others due to the varying responses to different parts of the survey instrument.

Enrollment

Full-time enrollments in masters programs increased steadily from the mid-1950s to 1978. Table 29 shows that in 1979 full-time enrollments began to fall, bottoming out in 1986 at a 15-year low. Since 1986 programs reported an increasing number of full-time students. This year's record 20,671 full-time masters degree students continues a trend of rapidly increasing enrollment. Part-time enrollment was not affected by the decrease in full-time enrollment in the early 1980s. It has increased steadily and also has hit an all-time high of 10,795. These increases in enrollment are particularly interesting in light of the fact that there has not been a 100% response to the annual statistics survey since 1985. This year's enrollments represent a 6.2% increase in full-time enrollment and 5.5% in part-time enrollment from last year's. Part-time students make up 34.3% of all masters programs' enrollments. Furthermore, part-time students outnumber full-time students in 19 of the 104 programs responding to the survey. Thirty-five programs reported that at least 40% of their students are enrolled part-time. It should be noted that the number of accredited masters programs has increased slowly over the years.

Enrollment in doctoral programs increased until 1980 and vacillated somewhat during the next decade. It did, however, mirror the steady decline in masters programs' enrollment in the early 1980s. Although last year showed a record number of full-time students, this year's figures show that in 8 of the last 10 years part-time doctoral students have out-numbered full-time students.

TABLE 29

Students Enrolled in Masters and Doctoral Programs 1967-1992**

Year	Masters Programs	Doctoral Programs	Year	Masters Programs		Doctoral Programs	
	Full-time	Full-time		Full-time	Part-time	Full-time	Part-time

* Response rate of less than 100 percent.

Applications and Admissions to Masters Degree Programs

Table 30 shows that applications to masters degree programs in 1992 increased by 18.8% over 1991. Of those, applications to full-time programs rose by 19.5% and applications to part-time programs rose by 17.2%. Programs were more selective this year, accepting 6.6% fewer students for admission than last year. A higher percentage of applicants to part-time programs were accepted and registered than were applicants to full-time programs. Data from one program were not received and are not included in this table for full-time applicants received, considered, and accepted.

Table 31 displays data concerning action taken on applications for advanced standing status in masters degree programs. The majority of applications (74.5%) for advanced standing came from individuals who held a baccalaureate degree in social work from an institution other than the one to which the application was made. An additional 20.0% of applications were received from graduates of baccalaureate programs under the same auspices as the prospective masters programs. The applicants who choose to stay in the same university from which they received their baccalaureate degree are more likely to be accepted and enroll than are their colleagues who apply to a masters program in a university different from the one which awarded their baccalaureate degree.

TABLE 30

Applications for Admission to First-year Status in Masters Degree Programs
in 1991 and 1992, by Action Taken

Year	Program	Action

Degrees Awarded

As would be expected, the number of degrees awarded to students completing masters and doctoral degrees is proportionate to the number of students enrolled at the same time. Therefore, as Table 32 shows, the number of masters degrees awarded until the 1978-79 academic year was increased from year to year. In the 1980s, the number of masters degrees awarded fluctuated up and down, with a general downward trend until the 1986-87 year. This year a record 11,582 masters degrees were awarded, a 5.6% increase over 1991. The number of doctorates conferred has remained steady over the past 3 years. Doctoral programs conferred 2 fewer degrees than last year, a figure that has added importance in light of the fact that 92.5% of the doctoral programs responded this year compared to last year's 100% response.

TABLE 32

Graduate Students Awarded Masters and Doctoral Degrees,
Academic Year 1966-67 through 1991-92**

Academic Year	Masters Degree	Doctoral Degree	Academic Year	Masters Degree	Doctoral Degree

1976-77	9,254	179	1989-90	10,063*	247*
1977-78	9,476	178	1990-91	10,969*	245
1978-79	10,080*	174*	1991-92	11,582*	243*

* Response rate of less than 100 percent.

** 104 of 106 masters and 49 of 52 doctoral programs responded to this part of the survey.

Demographic Characteristics of Graduate Students

Table 33 displays the gender breakdown of graduate students. Females continue to make up the vast majority of masters degree students (81.8%). A higher proportion of males are enrolled in doctoral programs, however, making up almost one-third of all full-time students. This also represents a slight decrease in the number of males enrolled in full-time doctoral study. Gender distribution is similar for recipients of degrees at the two levels as for those enrolled. Overall, these proportions have not changed much in recent years.

TABLE 33

Percentage of Full and Part-time Masters and Full-time Doctoral Students
Enrolled on 11/1/92, and Graduate Students Awarded Degrees 1991-92, by Gender*

Gender	Masters Students			Doctoral Students	
	Enrolled			Enrolled Full-time	Awarded Doctoral Degrees
	Full-time	Part-time	Total		
Male	17.5	19.4	18.2	32.5	37.4
Female	82.5	80.6	81.8	67.5	62.6
Total	100.0	100.0	100.0	100.0	100.0
Number	20,551	10,711	31,262	1,000	243

* Column totals may not correspond between tables within this report due to variance in response rates.

Table 34 displays the age of graduate students enrolled full-time and part-time in graduate social work education. Females aged 25 and under are the largest group among full-time masters students. Part-time masters students are more frequently females aged 31-40. Both full and part-time males are more likely to be in the 31-40 age group. These characteristics are consistent with last year's statistics. At the doctoral level, females are typically aged 41 and over while males are more likely to be in the 31-40 category if full-time and over 41 if part-time. In general, the proportions displayed here are comparable to those of last year.

TABLE 34

Percentage of Masters and Doctoral Students Enrolled on 11/1/91, by Gender and Age*

Age	Gender	Masters Students		Doctoral Students	
		Full-time	Part-time	Full-time	Part-time
25 & under	Male	3.7	2.2	0.8	0.0
	Female	29.7	13.3	3.2	0.2
26 - 30	Male	4.3	4.5	3.8	1.2
	Female	18.1	18.4	9.7	4.5
31 - 40	Male	5.7	7.2	14.7	12.7
	Female	18.5	25.3	23.1	25.1
41 & over	Male	3.8	5.6	13.7	16.6
	Female	16.1	23.5	31.0	39.7
Total	Male	17.5	19.4	33.0	30.5

	Number	20,551	10,711	897	995

* Column totals may not correspond between tables within this report due to variance in response rates.

Ethnic minorities made up 18.8% of full-time and 19.6% of part-time masters degree students (Table 35). There was a slightly higher percentage of minorities enrolled in doctoral programs in both full-time (22.1%) and part-time (18.8%) than last year. An increase was seen in minority masters students as well. Persons in the United States on a student visa ("foreign") make up a very small percentage of masters degree students. However, foreign students received 11.9% of the doctoral degrees awarded in 1991-92. The percentage of minorities that graduated from doctoral programs rose sharply this year from 15.1% to 19.3%.

Concentration of Study

Data were gathered on the primary methods concentration of every masters degree student enrolled in schools of social work. Schedule III did not define any of the "methods of practice categories" or "fields of practice or social problem categories." Programs were asked to place student information in cells that represented "methods" and "social problems." Tables 36 and 37 display that information in two different ways.

Table 36 shows that most masters degree students have or will have declared a methods concentration. Of those, 27.1% have chosen to concentrate only on that particular method of practice. Most students (69.8%), however, study a method of practice in conjunction with a primary field of practice or social problem concentration. "Direct practice" is the most popular method and "generic" practice runs a distant second. The proportions displayed in Table 36 are generally consistent with those reported last year.

TABLE 36

Masters Degree Students Enrolled on 11/1/92, by Primary Methods Concentration*

Methods	Concentration Framework							
	Methods Only		Methods Combined with Field of Practice or Social Prob.		Field of Practice or Social Problem Only (No Methods)		Total

* Column totals may not correspond between tables within this report due to variance in response rates.

Table 37 displays the distribution of students who are studying a particular field of practice or social problem concentration. Mental health continues to be the concentration taken by the most masters degree students (12.8%). Family services, health, and child welfare (in that order) are runners-up. Very few students choose other concentrations. Overall, there was no noticeable change between the concentrations from 1991. Almost half of masters degree students were reported as either having not yet determined their social problem concentration or only concentrating on a method. A decrease of 4.7 in the percent of students studying methods only is shown this year.

TABLE 37

Masters Degree Students Enrolled on 11/1/92, by Primary Field of Practice or Social Problem Concentration*

Type of Concentration	#	%
Aging/Gerontological Social Work	792	2.5
Alcohol, Drug or Substance Abuse	488	1.6
Child Welfare	2,148	6.8

Total	31,466	100.0

* Column totals may not correspond between tables within this report due to variance in response rates.

Concentration of Field Instruction

Although students may choose to study a particular field of practice or social problem, the location of their field instruction may not correspond with their study concentration. Table 38 shows the primary field of practice in which masters students were placed on November 1, 1992. The most frequent concentrations in this table are the same as in Table 37, but many students who may study in one social problem area may work in another field of practice in their practicum. Mental health claims 15.8% of field placements. Following mental health, health, family service, and child welfare lead all the other fields of practice. Over one-third of masters students either were not yet assigned field instruction on November 1, 1992 or were not to be in field instruction this year.

TABLE 38

Masters Degree Students Enrolled on 11/1/92, by Primary Field of Practice in Field Instruction*

Type of Concentration	#	%
Aging/Gerontological Social Work	884	2.8
Alcohol, Drug or Substance Abuse	810	2.6
Child Welfare	2,205	7.0
Community Planning	561	1.8
Corrections/Criminal Justice	467	1.5
Family Service	2,941	9.3
Group Services	251	0.8
Health	2,956	9.4
Occupational/Industrial Social Work	283	0.9

Mental Retardation	280	0.9
Public Assistance/Public Welfare	293	0.9
Rehabilitation	235	0.7
School Social Work	1,349	4.3
Other	1,578	5.0
Not Yet Assigned Field Instruction	4,308	13.7
Not To Be In Field Instruction This Academic Year	7,105	22.6
Total	31,466	100.0

* Column totals may not correspond between tables within this report due to variance in response rates.

Financial Aid

As noted in Table 39, just over one-quarter of full-time graduate students receiving financial aid in 1992 were members of an ethnic minority group. A slightly lower percentage of doctoral students who are minorities received financial aid. Of those minorities receiving financial aid, over half were African American. As throughout this report, comparisons between tables should be made with caution. Among masters students, 87.5% of Puerto Ricans and 75.7% of African Americans received financial aid. Seven out of ten ethnic minority graduate students received financial aid as of November 1, 1992. At the doctoral level, small numbers of minorities enrolled full-time make it difficult to interpret accurately the percentage of students receiving financial aid within any ethnic minority category. Because of the small numbers at the doctoral level, a year to year comparison of these percentages is not very reliable. At the masters level it can be noted that the proportion of full-time students receiving financial aid to those who do not has dropped slightly for minorities (from 72.4 to 71.4), but increased for all students (from 51.2 to 52.2) between 1991 and 1992.

TABLE 39

Full-time Masters and Doctoral Students Receiving Financial Grants on 11/1/92, by Ethnicity*

Ethnicity	Masters Students			Doctoral Students		
	#	Cum %	% of all in category	#	Cum %	% of all in category
African American	1,611	14.9	75.7	79	14.3	58.5
Asian American	233	2.2	54.4	18	3.3	81.8
Chicano/Mexican American	312	2.9	59.5	19	3.4	79.2

* Column totals may not correspond between tables within this report due to variance in response rates.

Table 40 shows the different sources of the financial aid received by full-time masters and doctoral students on November 1, 1992. This represents all awards made, regardless of number of sources. Therefore, if one student represented in Table 39 received an award from three different sources, that student would be counted three times in this table.

Students receiving financial aid from sources other than their field placement received it most often from formal loan programs, followed by their school or university. Other sources were infrequent in comparison. Among those awards given by a student's field instruction agency, social welfare agencies and state or local governments were the most frequent. Federal work study programs, other work study programs and private foundations each gave at least 10% of financial aids awarded to field students. As would be expected, more doctoral awards were given by a student's school or university (34.0%) and by research or graduate assistantships (33.3%) than all the other sources combined. The sources of financial aid for graduate social work education have not greatly varied from year to year.

TABLE 40

Financial Grants Awarded to Full-time Masters and Doctoral Students on 11/1/92, by Source of Funds

Source of Funds	To Masters Students						To Doctoral Students

Student-Faculty Ratio

Table 41 displays the student-faculty ratios for masters and doctoral programs. For the purpose of calculating ratios, full-time students were counted as one and part-time students were counted as one-half. Faculty were counted according to the amount of time they spent at the masters and doctoral level. For instance, faculty members who spend 100% of their time in social work, but split their time between the masters program and the doctoral program, 50% would be counted toward the masters ratio and 50% to the doctoral ratio. Likewise, part-time faculty members who spend 30% of their time in social work and split it between the two programs, 15% would go to masters and 15% to doctoral. Programs in which the time allotted to doctoral and masters programs was nil or missing in over 25% of their faculty entries were not included in Table 41.

Masters programs reported a slightly larger student-faculty ratio this year than last with a median of 13.3:1. Doctoral programs have a smaller median student-faculty ratio at 9.7:1. The modal ratio group (15.0:1 and over) is well above that of the median for masters programs.

TABLE 41

Student-Faculty Ratio in Masters and Doctoral Programs on 11/1/92*

Student-Faculty Ratio	Masters Programs		Doctoral Programs	
	#	%	#	%
Less than 6.0:1	1	1.0	3	7.0
6.0:1 - 8.9:1	13	13.4	14	32.6
9.0:1 - 11.9:1	26	26.8	12	27.9
12.0:1 - 14.9:1	20	20.6	6	14.0
15.0:1 and over	37	38.1	8	18.6
Total	97	100.0	43	100.0
Median	13.3:1		9.7:1	

* Column totals may not correspond between tables within this report due to variance in response rates.

PROGRAMS IN CANDIDACY FOR ACCREDITATION

The characteristics of programs in candidacy status for accreditation have not changed greatly since last year. Forty-one programs were polled to determine the ethnic and gender identification of their graduates. Of those 41 programs, there was 1 stand-alone graduate program, 29 stand-alone baccalaureate programs, 10 graduate programs jointly administered with baccalaureate programs, and 1 baccalaureate program jointly administered with an accredited masters program. As noted in Table 1, 38 programs responded to Schedule V. Table 42 shows that baccalaureate programs reported 316 graduates and masters programs reported 181 graduates. Because of the small numbers reported, it is difficult to state trends with reliability. However, it is clear that African Americans greatly outnumber members of other ethnic minority categories graduating from baccalaureate programs in candidacy. The proportion of minorities graduating from baccalaureate candidacy programs is lower than that of fully accredited programs (see Table 28). Masters programs in candidacy status graduated 19.3% minorities, which is comparable to that of fully accredited programs.

TABLE 42

Students Awarded Degrees in Programs in Candidacy 1991-92, by Ethnicity and Gender

Ethnicity	Baccalaureate Programs			Masters Programs		
	Male	Female	Total	Male	Female	Total
African American	8	30	38	3	7	10
Asian American	1	3	4	0	1	1

Total	48	268	316	49	132	181

RECENT TRENDS IN SOCIAL WORK EDUCATION

Tables 43 and 44 display selected characteristics of social work education over the last five years. General trends may be seen in these displays, but they must be interpreted with caution. During the last eight years, the response rate has not been 100% on any schedule except for the doctoral surveys, which were 100% in 1988 and 1991. As noted earlier, response rates to specific items also vary within schedules.

Table 43 shows trends in baccalaureate programs. The total number of faculty, enrollments, and graduates all show a steady increase. The number of accredited stand-alone baccalaureate programs appears to be steady over the last five years. However, attrition and periodic re-coding of CSWE membership records to designate more programs as "joint" are responsible for this. The proportion of women and minorities on baccalaureate faculties is increasing slightly. The proportion of women enrolled in baccalaureate programs appears to be steady while the proportion of ethnic minorities enrolled could be showing an increase.

An analysis of trends in graduate social work education (Table 44) is not as simple or reliable as that of baccalaureate education primarily because there are more than three times as many baccalaureate programs. The most obvious trends compare with those of the baccalaureate programs. The total number of programs, faculty, full and part-time students, and graduates have steadily increased. The proportion of the different professorial ranks varies from year to year, but has not changed a great deal. The proportion of females and minorities on faculties has increased recently. Salaries have increased between 14 and 20 percent over the past 5 years. All statistics for masters students have shown an increase recently. The only decrease shown is in the percent of applications accepted for first-year status in masters degree programs and a slight decrease in the percent of full-time women enrolled.

Reference Tables

List of Reference Tables

	<u>Page</u>
<u>Baccalaureate Programs</u>	
100. Number of Juniors and Seniors, by Gender and Ethnicity, and Number of Freshman and Sophomore Full-time Degree Students Enrolled in Baccalaureate Programs on 11/1/92	49
101. Students Awarded Baccalaureate Degrees Academic Year 1991-92, by Gender and Ethnicity	58
<u>Masters Programs</u>	
200. Applications for Admission to First-year Status in Full-time Masters Degree Programs During 1992, by Action Taken	67
201. Applications for Admission to First-year Status in Part-time Masters Degree Programs During 1992, by Action Taken	70
202. Applications for Admission to Advanced Standing Status in Masters Degree Programs During 1992, by Action Taken	73
203. Full-time Masters Degree Students Enrolled on 11/1/92, by Ethnicity	75
204. Full-time Masters Degree Students Enrolled on 11/1/92, by Age and Gender	77
205. Masters Degree Students, by Primary Methods Concentration	79
206. Masters Degree Students, by Primary Field of Practice or Social Problem Concentration	82
207. Masters Degree Students, by Primary Field of Practice in Field Instruction	85
208. Full-time Masters Degree Students Receiving Financial Aid Not Tied to Current Field Instruction, by Source of Funds	88
209. Full-time Masters Degree Students Receiving Financial Aid Paid Directly by Field Instruction Agency, by Source of Funds	91
210. Unduplicated Count of Full-time Masters Degree Students Receiving Financial Aid From All Sources and Number of Grants Awarded	94

<u>Doctoral Programs</u>	<u>Page</u>
300. Number of Faculty Assigned 50 Percent or More Time to Social Work Program, by Percentage of Time Assigned to Doctoral Program	95
301. Full-time Doctoral Students Enrolled on 11/1/92, by Ethnicity	96
302. Full-time Doctoral Students Enrolled on 11/1/92, by Age and Gender	97
303. Applications for Admission to Doctoral Degree Programs During 1992, by Action Taken	98
304. Full-time Doctoral Students Receiving Financial Aid and Number of Grants Awarded, by Source of Funds	99
305. Unduplicated Count of Full-time Doctoral Degree Students Receiving Financial Aid From All Sources and Number of Grants Awarded	101

Other Tables

400. Full-time Masters and Doctoral Students Enrolled in Social Work Programs, 1983 through 1992	102
401. Students Enrolled on 11/1/92, by Type of Enrollment	104
402. Students Receiving Degrees During Academic Year 1991-92, by Degree and Gender . .	106
403. Number of Full-time Non-administrative Faculty Assigned 50 Percent or More Time to Social Work Program, by Gender, Type of Appointment, and Academic Responsibility	107
404. Ethnic Characteristics of Full-time and Part-time Graduate Faculty	110
